# | IMPLICITITY

:implicity

*IMPLICITITY allows remote monitoring of all patients with cardiac implants with the support of AI for time saving and preventive medicine.*

- **Project Leader**

Dr Arnaud ROSIER

[arnaud.rosier@implicity.fr](mailto:arnaud.rosier@implicity.fr)

IMPLICITITY allows physicians to efficiently monitor all their patients remotely with the support of AI, so they provides to their patients the best care, and save time.

Our users are the electrophysiologists (specialized in cardiac implants) and their teams who don't have the right tools to monitor their patients.

- **Mentor**

Martin Prodel, Data Scientist chez HEVA
